

The Follow-Me Track-iT tag is a compact device that is to be placed on a performer or an object for tracking purposes. The tags can be easily attached to a person's pocket or belt. There's no limit to number of tags used in the Follow-Me Track-iT system.

Two tags are attached per performer, this improves line of sight between the tags and the anchors throughout the performance area, and is also done for redundancy purposes.

The Follow-Me Track-iT tags are to be charged using the Follow-Me Track-iT Tag Charger.

SPECIFICATIONS

- UWB transceiver
- Integrated omni-directional UWB antenna
- Integrated Motion Processing Unit
